POND WATER MANAGEMENT INTERIM MEASURES/INTERIM REMEDIAL ACTION PLAN
(IM/IRA) SCHEDULE - TRD-001-93

Attached is the revised schedule and assumptions for the development of the Pond Water Management IM/IRA. The December 15, 1993 delivery date for the document assumes an EG&G review of the document prior to transmittal to DOE/RFO. The DOE/RFO and EG&G review process could be shortened by approximately seven weeks should a joint, in-depth, concurrent, technical review be agreed upon. This would move the delivery date to the third week of October, 1993.

The following summary of our meeting held on July 6, 1993 is taken from a memo provided by G. V. Porter of the Surface Water Division.

A meeting was held at 1:00 PM on July 6, 1993 at Building 116 to review the revised IM/IRA schedule. Those in attendance were:

Frank Blaha, Wright Water Engineers
Norma Castaneda, DOE/RFO
Tye De Mass, EG&G/ER
Gail Hill, DOE/RFO
Georgene Porter, EG&G/SWD

The following is a summary of the main topics of discussion.

QUESTION: DOE/RFO asked if the revision of the IM/IRA rough draft (Task 3 of Phase 2 per revised schedule attached) was on schedule and completed by July 2, 1993.

RESPONSE: The comments and revisions received from DOE/RFO and EG&G management have been incorporated into the rough draft. The changes resulting from the June 1993 revision of the Table of Contents are still being completed as new information is compiled.

QUESTION: DOE/RFO requested a copy of the draft of revised Chapters 1-4 on August 2, 1993 for review to insure that the document will meet DOE/RFO

expectations and reduce total document completion time.

RESPONSE: EG&G responded that this would not be possible for the following reasons:

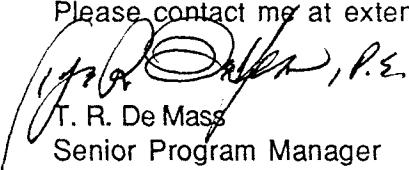

1. The statistical analysis section is delayed approximately one week due to the voluntary termination of EG&G key personnel. The development of risk analysis sections of the document is being accelerated in an effort to reduce the affect of this delay on overall schedule. Completion of the draft of Chapters 1-4 by August 2, 1993 is doubtful in spite of these efforts.
2. This is an aggressive schedule. EG&G management and staff remain committed to the scheduled delivery date. A document commensurate with DOE/RFO demonstrated standards of quality cannot be developed within a reduced time frame, particularly without sufficient time allowed for EG&G internal management and technical review.

QUESTION: DOE/RFO stated that they may request a briefing from EG&G/ER and WM AGM's for DOE/RFO upper management on the revised schedule. The EPA and CDH have requested a status report in September 1993.

RESPONSE: EG&G stated that should such a briefing be required, arrangements will be made to accommodate the meeting.

DOE/RFO, EG&G, and Wright Water Engineers agreed to conduct bi-weekly meeting to discuss IM/IRA issues and accomplishments. The first meeting is scheduled for July 15, 1993. The DOE/RFO meetings will be conducted the day following the bi-weekly "working" meetings held between EG&G and Wright Water Engineers.

Please contact me at extension 8760 should you require clarification.
